Some 22.5 million downloads later, Fedora 22 is finally ready for download. After performing a routine set of package updates, the latest release of Fedora is also available as a DVD image. In addition to the live DVD, Fedora 22 also includes the option of installation from the Live USB media. The release represents the latest stable version of the award winning Linux distribution. Previous to this, the latest stable release was last April's Fedora 21. Despite this, there are already several new features in the new release. These include a new display manager, systemd, improved UEFI support and a new graphical installer. From system administrators to developers, Fedora offers something for everyone. Among those who are curious about the new release, the Fedora team invites users to try Fedora live and then install it on their systems. The team says they are also looking for feedback. For those interested in a tutorial, Fedora 22
